

▶ Leaf Blowers

Considered an industry leader in performance, durability and selection, RedMax's handheld and backpack blowers are efficient, powerful and easy to operate. All backpack units are equipped with variable speed cruise control throttles. Engineered for comfort, backpack models include extra-wide shoulder straps and a contoured, air-forced, cushioned back pad that keeps users cool in the field. Handheld blowers have a lightweight construction and are extremely well-balanced for easier handling. RedMax backpack blowers use only commercial-grade engines with large 2-stage air filters for long service life. Most models include our patented Strato-Charged® engine technology. Backpack blowers are also equipped with wide-sweep elbow rotation for full operator mobility and maneuverability, even in cold weather. Commercial backpack blowers are equipped with Free Flow air net, which reduces air intake blockage providing maximum blowing performance.

▼ Model EBZ8050 Features & Benefits*

All RedMax backpack blowers have a 2 year commercial warranty and lifetime ignition coil warranty.

- MaxClean 2 way air cleaner system protects engine from dust.
- Wide shoulder straps and contoured back pad with air ventilation provides extra comfort especially during the hot summer months.
- Free Flow air net system protects engine from over heating.
- Duck bill nozzles are available for extra versatility and speed.
- Large diameter tube creates more air volume.
- A blow molded frame is more durable and 3 rubber anti-vibration systems provide greater comfort.
- Available in standard hip mount throttle or right hand (RH) tube mount throttle to suit operator's preference.
- Large, upright, easy view fuel tank provides long running time and allows the operator to quickly check fuel level.
- Strato-Charged® engine is a pure 2-stroke engine without using a catalytic converter. For more information see page 4.

▼ Model HBZ2610 Features & Benefits*

- Convenient one push stop switch.
- Front exhaust.
- Assist handle for double hand operation and stable stand.
- Clear fuel tank is easy to fill and allows the operator to quickly check the fuel level.
- Heavy-duty double element air cleaner system helps protect engine from dust.
- Optional attachments include a duck bill nozzle for extra versatility and high speed nozzle for more air speed.

Vacuum kit available.

*See page 8 for full model line up and specifications. Features may vary by model.
